Quality Assurance Manager

RFNOW Inc. is seeking applications from motivated individuals to join our team as a **Quality Assurance Manager**. Responsible for reviewing and evaluating Fiber-to-the-Home (FTTH) construction projects, including using the plan design against new build, span and drop replacements (if needed), risers, aerial installations, bonding and grounding of the strand (messenger), proper installation of any fiber-optic cable, splice cases and cabinets, splitters and XWDM (Wavelength Division Multiplexing), underground installations (bores, vaults, and trenches) and MDU lockbox replacements.

Key Responsibilities

- Perform construction inspections for quality control in accordance with the company's standards.
- Verify that property restoration is consistent with Company's standard practice.
- Operate test equipment as needed to verify optical and RF power levels are set as designed.
- Document (in still image and/or video) that aerial construction, underground vaults and cabinets have been built and installed as planned.
- Prepare work orders to resolve any element in the plant that does not meet specifications.
- Communicate with Project Manager or designated Supervisor regarding concerns about construction progress.
- Ability to work weekends or a second shift as the business needs dictate.
- Perform emergency locates as necessary.
- Adhere to industry specific local, provincial, and federal regulations, as applicable.
- Perform other duties as requested by supervisor.

Qualifications & Experience

- Five (5) years of experience in the construction, maintenance, and repair of the outside plant (OSP) that supports fibreoptic services
- Working knowledge of safe construction practices used in building aerial and underground communications networks.
- Demonstrated problem solving and analytical thinking skills.
- Excellent written and verbal communication skills
- Ability to read and interpret general system layouts from blueprints and system maps.
- Familiarity with computer or test equipment associated with position (ex. signal level meters, ohm meters, etc.)
- Valid class 5 driver's license with satisfactory driving record

Work Environment

- Office based and on-site in varying environmental conditions.
- Walking over all types of terrain in all kinds of weather.
- Cover a large geographic area across Southern Manitoba and Saskatchewan
