

Setup Email on an Android Device

IMAP Setup:

- Launch your Email App
 - a. Open the App drawer on your Android device
 - b. Select **Email**
- 2. Add an email account
 - a. If this is the first email account configured on your device, you will see a setup screen. If this is not the first email account to be set up, select **Menu / More - Settings - Add Account**
 - b. Enter your RfNow email address and password
 - c. Select **Manual Setup**
 - d. Select **IMAP Account**
- 3. Verify incoming server settings
 - a. IMAP server: **mail.rfnow.com**
 - b. Security type: **SSL**
 - c. Port: **993**
 - d. User name: rfnow email address
 - e. Password: Your email password
- 4. Verify outgoing server settings
 - a. SMTP server: **smtp.rfnow.com**
 - b. Security type: **TLS**
 - On some devices this may appear as **StartTLS** or **StartTLS (accept all certificates)**
 - c. Port: **587**
 - d. User name: *rfnow email address*
 - e. Password: *Your email password*
- 5. Confirm additional account settings
 - a. Choose sync settings
 - b. Choose account name and display name
- 6. Select **Done** or **Finish**
